

**Dag jongens en meisjes,**

Leuk zeg! Je hebt het scheurblok Arithmos hoofdrekenen in je hand. Een blokje vol met rekenoefeningen uit het tweede leerjaar. Je kunt er zelf mee aan de slag, in de klas of thuis.

Er zijn verschillende soorten oefeningen. Eerst reken je tot 10, dan tot 20 en daarna tot 100. Je oefent optellen en aftrekken. Daarna komt er altijd een gemengde reeks. Per blad staan de oefeningen van gemakkelijk naar moeilijk geordend.

De oplossingen vind je in een apart boekje. Je kunt elk blaadje dus zelf nakijken. Schrijf je score onderaan het blad. Je fouten kun je op de achterkant verbeteren.

Veel plezier ermee!

**Dag juffen en meesters,**

Deze Arithmos hoofdrekenen behandelt de leerstof hoofdrekenen van het tweede leerjaar. De oefeningen zijn gerangschikt per soort, telkens binnen een ander getalbereik. Na elke reeks is er minstens één reeks gemengde oefeningen.

De scheurblaadjes kun je in de klas gebruiken...

- om leerlingen alleen, per twee of in groepjes te laten werken
- als extra oefenstof voor snelle leerlingen of om zwakke leerlingen te remediëren
- als werkblaadjes bij contractwerk en hoekenwerk
- als huiswerkblaadjes
- als voorbereiding op een toets over een specifiek onderdeel van hoofdrekenen

Veel plezier ermee!
